

Lab technician

Do you thrive on implementing challenging and diverse laboratory projects? Do you flourish in a team-focused, flexible, and fun atmosphere? Cryptobiotix is hiring!

If so, send us your CV, tell us why you think there is a fit, and let's talk.

Cryptobiotix was founded in 2021 to help develop new treatments for people and animals by studying the gut and microbiome. Our unique SIFR® technology allows faster, more realistic lab testing to improve early research results. We focus on transparency, trust, and long-term relationships with our employees, customers, and partners.

1. Position summary

We are looking for a full-time **lab technician** to strengthen our operational team. You will be primarily involved in contract research projects, while contributing to internal R&D projects as needed. As lab technician, your critical and quality-driven mindset enables you to accurately perform **routine analyses**, and to identify and report issues. You focus on **hands-on laboratory work** and enjoy a highly **diverse task portfolio**. Your key responsibilities involve to:

- perform preclinical simulations using Cryptobiotix's SIFR® technology
- execute a variety of **routine analyses** in accordance with established protocols
 - accurately **document** experimental work
 - **prepare** reagents
 - **evaluate analytical results** and identify deviations or inconsistencies
 - operate and troubleshoot laboratory **equipment**
 - maintain a **clean and organised** laboratory environment

You'll work closely with a team of fellow lab technicians. The role comes with guided planning from our project management team.

2. Experience, skills and education requirements

- **Bachelor's degree** in nutritional, biological or chemical sciences
- **English** proficiency
- **Laboratory mindset**
 - team player
 - honest, focused, accurate and critical mindset
 - likes to understand reasoning behind specific implementation
 - flexible and able to adapt to changing priorities and dynamic planning
 - eager to learn and improve
- (optional) prior **lab experience** in microbiology or gastrointestinal research.

Bonus points for

- 2-5 years of prior lab experience in microbiology or gastrointestinal research

3. Package

We offer a **competitive salary package**, matching your fit for the position and experience. Additional benefits include:

- **Meal vouchers** worth €10 per working day
- Premium **insurance package** including dental care and outpatient care
- **Mobile phone** subscription
- **Group insurance**
- Coffee, tea, water, fruit & snacks
- Bike leasing possibilities
- Great working **atmosphere** (transparent, authentic, honest, valuing well-being)
- **Support** on your career pathing
- **Fun** colleagues (20+ and counting)

The yearly gross salary range for this position is **37.5 - 53 k€**, based on degree and experience.
